

# The Management of Contaminated Land Workshop

www.equipetraining.co.uk

**TerraConsult**

## Introduction

The course comprises a comprehensive overview of the processes involved in the management of contaminated land. Equip Training are running one day workshops which have the prime objective of providing delegates with an understanding of how land affected by contamination is managed.

The workshop will comprise a series of lectures outlining the legal framework and current available guidance, the process of risk assessment, the appraisal of remedial options, reporting, remediation strategy and design considerations, controls, permits and verification. The workshop will comprise a series of lectures with a number of short practical sessions.

## Course Arrangements

Equip Training have partnered with TerraConsult Limited to provide this course and Robert Lingard is the presenter. He is a Chartered Chemist with over 22 years experience in site investigation, chemical testing, assessment and remediation of potentially contaminated land. Robert is an accredited Specialist in Land Condition (SiLC); this qualification is the UK's only recognised professional qualification in the assessment and management of contaminated land.

## Outline Programme

09:00 Registration & Refreshments
09:30 Lecture - Introduction and the legal framework
10:15 Lecture . Investigations and Risk Assessment Part 1
11:00 Morning Break
11:15 Lecture . Investigations and Risk Assessment Part 2
12:15 Lecture - Data Quality and Reporting
12:45 Lunch
13:45 Lecture - Remediation Options Appraisal and Strategy
14:35 Lecture - Remediation Design Considerations and Contracts
15:10 Afternoon Break
15:20 Lecture . Regulatory Controls and Verification
16:30 Conclusions
16:45 Close

## Who should attend ?

*A must for all practicing Geologists, Chemists and Engineers who are or may become involved with the management of land affected by contamination. This course will greatly enhance understanding of the issues discussed in CLR11.*
